2024 PRICING

CONNECT WITH OUR EXPERTS

www.annualreviews.org/2024pricing

SUBSCRIBE TO OPEN

Subscribe to Open (S2O) is a business model that uses subscription payments to convert gated access journals to full Open Access (OA). The 2024 online volumes of all Annual Reviews journals will be offered under the **S2O** model.

Your subscription matters.

Under **S2O**, institutional customers continue to subscribe to the journals that their patrons value. If support is sufficient, new volumes are published OA under a Creative Commons license; if support is insufficient, the paywall is retained. Thus, **S2O** is a subscription model, not a voluntary donation approach. It offers a partnership for rapid and equitable conversion to OA for readers and authors in all disciplines. For more information, please visit: www.annualreviews.org/S2O

S2O provides Diamond OA, meaning that the final article is immediately available with no access barrier and no author fee.

S2O is endorsed by OA2020 and by cOAlition S.

S2O is inclusive; it is applicable to all readers and authors, in all disciplines, in all countries.

*Subscribing institutions benefit from pre and post access rights regardless of target achievement.

“Libraries know as well as anyone the quality of Annual Reviews’ content and the positive global impact it would have if it were published open access. With their new Subscribe to Open program, Annual Reviews has developed a straightforward way for libraries to help make this happen. All a library has to do is agree to participate, for which they receive a discount, and then, if participation levels are sufficient, the journals flip to open. Simple, effective, important.”

Curtis Brundy, Associate University Librarian, *Iowa State University*

BENEFITS OF SUBSCRIBING TO ANNUAL REVIEWS:

- Guaranteed permanent data rights
- Access to Reviews in Advance (RIAs), which are articles available before their official publication date
- Enhanced back volume availability
- Seamless access for everyone at your institution, wherever they are, whenever they need it
- With the success of **S2O**, articles by authors from your institution are published under a Creative Commons license without article processing charges (APCs)

ACADEMIC TIER DEFINITIONS

Annual Reviews uses a tiered pricing model for academic institutions. We strive to provide value for money and make Annual Reviews widely available—our subscription prices remain among the lowest in the industry.

The needs of our customers differ by institution. Our tiered pricing model and collections recognize differences in demand for our publications and present fairer options for different-sized organizations.

TIER	USA: CARNEGIE CLASSIFICATION	REST OF WORLD ¹
1	Top 150 Academic Institutions, measured by research output ²	
2	15: RU/VH: Research Universities (very high research activity)	Highest Degree: Doctoral (very high research activity)
3	16: RU/H: Research Universities (high research activity) 25: Spec/Med: Special Focus Institutions—Medical schools and medical centers	Highest Degree: Doctoral (high research activity)
4	17: DRU Doctoral/Research Universities 26: Spec/Health: Special Focus Institutions—Other health professions schools	Highest Degree: Doctoral
5	18: Master's M: Master's Colleges and Universities (larger programs) 19: Master's M: Master's Colleges and Universities (medium programs)	Highest Degree: Baccalaureate/Associates
6	23: Bac/Assoc: Baccalaureate/Associate's Colleges 22: Bac/Diverse: Baccalaureate Colleges—Diverse Fields 21: Bac/A&S: Baccalaureate Colleges—Arts & Sciences 20: Master's: Master's Colleges and Universities (smaller programs) 1–14: Associate's Colleges	Highest Degree: Baccalaureate/Associates

¹Institutions in countries outside the US and UK categorized as World Bank Middle- and Low-Income Countries will receive pricing directly from our sales team.

"Most of us find ourselves buried amidst piles of unread papers. To keep abreast of the literature in biochemistry has become a Herculean task.... We hope, however, that the Annual Review will be of material assistance; for it is in the belief that critical surveys of the literature will minimize the task of constantly referring to original works, and that the *Annual Review of Biochemistry* will present from year to year reviews of the current developments of the major fields of interest."

Annual Reviews founder Dr. J. Murray Luck, *Annual Review of Biochemistry*, Volume 1, 1932

“As a nonprofit publisher, Annual Reviews can put service to the community foremost.... I believe that *Annual Review of Immunology* reviews have contributed to the pace of scientific discovery over the last 20 years. We must strive to do even better to exploit the opportunities presented to us and to meet the challenges we face in this uncertain world.”

“Luckily, one of my jobs as Editor of this journal is an early read of some of the submitted articles, and then, hopefully, a chance to read the rest as they appear online and in print. I venture to suggest that if every microbiologist randomly chose (no fair to pick the topics you already know the most about!) a half-dozen reviews to read from the *Annual Review of Microbiology*, they would all learn something new and pertinent to their own work that they may never encounter in a PubMed search.”

From the Editor of the *Annual Review of Microbiology*

“Reading the Annual Review is how we keep up with the advances across the vast sweep of studies... . At the same time, the [Annual Review] captures the evolution of [the field] in a time capsule that preserves the intellectual history of our field.”

“One of the essential criteria for publishing in *Annual Review of Entomology* is that the topic for review have a “mature” literature worth reviewing—and that authoritative reviewers of the relevant literature be available. A good review serves as an entrée into the field of study. Such a review should do what every good graduate student is meant to do: cover the literature, summarize an area while critically appraising the interpretations to date, highlight where there are gaps in understanding, and identify the questions still to be answered. It essentially points a way forward based on what has gone before.”

“We will look systematically at the mainstream developments in this field, and also explore the emerging multidisciplinary interactions, by inviting authors to review specific topics, and by trying to construct each volume as a useful sample of the most important ongoing developments. Our articles will not be comprehensive reviews of major subfields; rather, they will be relatively short summaries of emerging topics. Their main purpose will be to describe recent research in a style, and from a perspective, that will be useful to experts and yet be accessible to nonspecialists.”

"*Annual Review of Psychology* articles offer expert, integrative reviews that go beyond top-of-the-head sound bites or click bait, instead examining a topic's nuances and pros and cons, the weight of the evidence, and gaps in our knowledge to date. As such, they provide lasting insights about the current state of the field and ways forward.

What's more, our authors and topics are vetted by the expert Editorial Committee. Our articles are carefully reviewed by devoted colleagues and by the editors. So, take the time to experience some curated wisdom from hand-picked experts. It's time well spent."

"Today, our discipline is diverse, broad, and is changing rapidly. The *Annual Review of Economics* has the goal of giving every working economist access to the new ideas, new methods, and new developments across the entire spectrum of research. The papers are written for a general economics audience but in a rigorous and careful way, in order to introduce researchers to developments far from their own work."

ELECTRONIC BACK VOLUME COLLECTION (EBVC)

Annual Reviews offers a comprehensive online collection of back volume content spanning the Biomedical, Life, Physical, and Social Sciences dating back to the very first volume of the *Annual Review of Biochemistry* in 1932.

ADVANTAGES OF EBVC

- Sciences Collection back volumes providing coverage from 1932
- 50% of our worldwide usage comes from the EBVC
- Immediate online access to more than 1,300 volumes, including more than 30,000 authoritative review articles
- Permanent data rights to back volume journal content for your institution
- One-time purchase with no maintenance fees
- Available via full-text, searchable PDFs
- COUNTER compliant usage statistics

Invest in the EBVC and connect with our experts from the past 90 years of Annual Reviews.

The EBVC provides the ideal way to build your institution's online collection by supplementing existing access to current content.

The Charleston ADVISOR

Critical Reviews of Web Products for Information Professionals

NOW PUBLISHED BY ANNUAL REVIEWS

Founded in July 1999, *The Charleston Advisor* publishes detailed product reviews of proprietary and freely available web-based resources for the library market. Reviewed product types include databases, pricing tools, scholarly journals, and collections. More than 1,130 searchable expert reviews, peer-reviewed by the library community, are currently available to help optimize library services.

BENEFITS OF SUBSCRIBING to TCA:

- Access to more than 1,130 reviews published
- Online edition includes full backfile database
- Unlimited access via IP Filter or name/password
- Comparative reviews of aggregators featured
- Leading opinions in every issue

"We are pleased to welcome *The Charleston Advisor* to Annual Reviews. It is a good fit with our mission to synthesize and integrate knowledge and expands our horizons by providing high-quality reviews of products and services for library teams at academic and research institutions, a new group of readers for us."

Richard Gallagher, Publisher and Editor-In-Chief, Annual Reviews

ABOUT ANNUAL REVIEWS

ABOUT ANNUAL REVIEWS

For more than 90 years, Annual Reviews has been dedicated to synthesizing and integrating knowledge for the progress of science and the benefit of society. Our journal collections support academics and students at all levels, and increase the discovery and understanding of vital research contributions. Annual Reviews articles are often described as required reading for the research community.

VALUE OF REVIEW ARTICLES WITHIN THE RESEARCH ECOSYSTEM

Annual Reviews Articles:

- Capture current understanding of a topic, including what is well supported and what is controversial
- Set the work in historical context
- Highlight the major questions that remain to be addressed and the likely course of research in upcoming years
- Outline the practical applications and general significance of research to society

WHO USES ANNUAL REVIEWS?

- Researchers who want to keep abreast of their field and integrate this information with their own activities
- Researchers who want an introduction to new fields, with a view to developing an interface between different areas of research
- Students at all levels who want to gain a thorough understanding of a topic
- Policy makers, practitioners, journalists, business people, patients and patient advocates, and others who wish to be informed about developments in research
